

AMICO'S MULTI-LAYERED DEFENSE SYSTEM

Combining the Ultimate Physical Perimeter System with the latest in Next Generation Radar Technology.

AMICO provides turnkey solutions for critical facilities to detect unwanted intruders and stop them at the perimeter with the AMIGUARD / GroundAware® solution. GroundAware from Dynetics is a family of reconfigurable surveillance sensors for real-time situational awareness of extensive perimeters and grounds of critical facilities.

Built on next-generation radar technology, GroundAware detects intrusions in real-time and provides the information—integrated live video, mobile alerts, and classification of targets as human, animal, aircraft, or vehicle—that owner/operators need to respond ASAP.

GroundAware is a low-cost, easy-to-implement solution for addressing CIP-014 and other requirements with minimal human involvement and fewest false alarms. GroundAware easily integrates with existing surveillance assets.

- **Classifies targets - Human, Animal, Vehicle, Aircraft**
 - **Greatly reduces the number of cameras needed**
 - **Simple integration with existing equipment**
 - **Intruder detection greater than 2km**
 - **Simplifies monitoring**
